VEHICLE SERVICES

The UK's largest independent supplier of rail infrastructure vehicle services

Being an independent company, LH Group Services provides essential product overhaul and specialist repair services to all of the major rail infrastructure operators in the UK.

Accredited to Railway Group Standard GM/RT 2450 (Suppliers of Safety Critical equipment), LH Group complies with all the required industry quality and safety requirements.

Breathing New Life Into Old Equipment

Our extensive 'Complete Vehicle Overhaul' services apply to any piece and any size of rail infrastructure equipment. Complete control of each project is maintained with all overhaul processes undertaken in-house, including:

- Power-train re-manufacture
- Bogie and wheelsets
- Chassis
- Electrical
- Hydraulics
- Finished livery painting.

Continuous Product Development

LH Group Services is committed to provide its customers with the most up-to-date and advanced technology available. This allows the company to provide extensive product modification and development services for all infrastructure equipment. Re-engine packages are available providing greater efficiency and lower emissions. Upgrades are made to various products, such as cab and turntable installations for ease of operations on rail.

LH Access Technology

Part of the LH Group, LH Access Technology specialises in the supply of road/rail utility equipment. With an extensive product range, vehicles are available for outright and lease purchase, either with or without long term maintenance contracts. However, if you require, LH Access Technology also offers a wide range of road/rail vehicles for hire.

Any type of vehicle can be modified to suit your specific and individual requirements to operate on the UK rail infrastructure network. LH Access Technology will convert vehicles such as Unimogs, Crew Buses, Cranes and HGVs for road/rail operations by installing rail guidance systems. Each vehicle can be tailor made to carry various access platforms, cranes, drum carrying, workstations and vegetation and waste control systems.

Service and Maintenance

The company employs a network of site and service engineers who are strategically placed throughout the UK, and provide essential support and engineering assistance. As expected from a major rail supplier, all our rail support staff are COSS qualified and hold PTS certification.

Quality and Safety

Operating in the safety critical world of the European Rail network, LH Group Services complies with the most stringent quality assurance testing procedures in the industry:

- Railway Group Standards GM/RT 2450
'Suppliers of Safety Critical Engineered Components'
- BS EN ISO9001:2000
- 'Link-Up' approved
- ATOC code of practice ACOP/EC/01003
- RGS GO/RT 3260 'Competence Management for Safety Critical Work'.

The company is also the first independent organisation, outside of the old British Rail 'umbrella' to gain approval for Railway Wheelset Assembly.
